

Certificate of employment

From request of the employee this certificate is given that Oyinloye Femi Adesola (090577) has been working at A-Insinöörin Civil Oy from 1.4.2011.

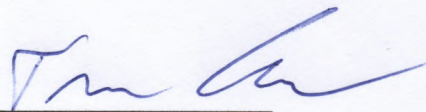

Oyinloye Femi Adesola has been working as a laboratory technical expert at A-Insinöörin laboratory, specifically in the field of engineered bentonite barriers for geological repositories of high-level nuclear waste. He has overseen the technical side of tests, working together and supporting science experts of various fields. The final customer reports & analysis were based on these experimental tests and have been formed by this kind of team. Mr. Oyinloye was also making the final technical designs based on the basic conceptual designs. Workshop drawings by Mr. Oyinloye were primarily done using SolidWorks.

Mr. Oyinloye has been involved in set-up, execution and dismantling of test devices and measurement systems. During the tests he oversaw the measurement devices and observations – both taking planned observations and measurements, as well observing and reporting the unexpected when it occurs. He was then part of the team in charge of scientific reporting of the tests as mentioned above.

Mr. Oyinloye also has had a role in developing new techniques and procedures with which the laboratory operates, as well as new methods how data is acquired from the laboratory tests and analyzed. In particular, he has been involved in applying at the laboratory a digital observation platform originally intended for construction sites. This method brings automated dataflow to on-the-spot observations.

Oyinloye Femi Adesola's conduct has been pro-active, and he has shown dedication and excellent work morale towards his duties. In addition, he has treated his colleagues and co-workers with respect and show great team spirit towards the entire work community.
